

HUSSEIN ABDOW

Mobile & Full-Stack Developer

Email: hussabdown@gmail.com LinkedIn: [linkedin.com/in/husseinabdown](https://www.linkedin.com/in/husseinabdown) GitHub: github.com/HusseinAbdown

CAREER SUMMARY

Developer focused on building complete digital products across mobile, web, backend, and UI/UX, with a long-term focus on social networking platforms. Experienced with Flutter, Java, Spring Boot, Python, REST APIs, databases, and modern development workflows. Strong in translating product ideas into structured applications, combining user-focused interfaces with reliable application logic and backend systems. Broad technical experience developed through building products end-to-end, with a focus on scalable architecture, usability, and continuous problem solving.

CORE STRENGTHS

- End-to-end product development across mobile, web, backend, and UI/UX
- Backend development focused on application logic, APIs, data, and system structure
- Strong problem-solving mindset with focus on algorithms, system logic, and architecture
- UI/UX thinking with attention to user flows, navigation, usability, and engagement
- Ability to translate product ideas into structured, maintainable applications
- Comfortable working across different layers of a product and understanding how they work together

TECHNICAL SKILLS

Mobile: Flutter, Dart

Backend: Java, Spring Boot (basics), REST APIs

Programming: Python

Design: Figma, wireframing, user flows

Tools: Git, GitHub

AI Tools: GitHub Copilot, AI-assisted coding, debugging, and development workflows

Languages: English, Turkish, Swahili

RELEVANT PROJECTS

Timberfy — Mobile Shopping Application *(Flutter & Dart)*

- Designed and built a multi-screen shopping application with focus on navigation clarity and UI consistency
- Practiced API design and separation of concerns for scalable architecture
- Built local database integration with a clean, reusable component structure

GitHub: <https://github.com/HusseinAbdown/timberfy>

VanLife — Car Leasing Web Platform *(PHP, HTML & CSS)*

- Built a full-stack car leasing platform for browsing available vehicles and managing active leases
- Implemented vehicle detail pages, lease management, and a customer review system
- Combined backend logic with a clean, browsable front-end experience

GitHub: <https://github.com/HusseinAbdown/vanlife>

Sticky Wall — Task Management Web App *(Node.js, Express & Firebase)*

- Built a full-stack task management app with a sticky-note styled dashboard for organizing tasks
- Implemented user-specific boards with completed/pending separation using Firebase Firestore
- Practiced RESTful API design with Express and real-time database integration

GitHub: <https://github.com/HusseinAbdown/sticky-wall>

Konfab — University Community Platform *(UI/UX Concept, Figma)*

- Designed an early-stage concept for a community-based academic discussion platform for students
- Focused on organizing communities by interest area to replace scattered, unorganized group chats
- Practiced end-to-end UI/UX design from wireframes to polished screens in Figma

Figma: <https://www.figma.com/design/McO1ICKaMKdoXFj1R8frxX/Konfab-University-Community-App>

EDUCATION

- Bartın University, Turkey
- Bachelor of Computer Engineering
- 3rd Year Student
